i Sequence 404, Application US/10871222

i Sequence 404, Application US/10871222

i Sequence 404, Application No. US20050119212A1

GENERAL INFORMATION:

APPLICANT: Sirna Therapeutics, Inc.

APPLICANT: Meswiggen, James Ligand (FASL)

TITLE OF INVENTION: RNA Mediated Inhibition Fatty Acid Synthase (FAS) and Fatty Acids

TITLE OF INVENTION: Number: US/10/871, 222

TITLE OF INVENTION: Number: US/10/871, 222

CURRENT FILING DATE: 2004-06-18

FRICK FILING DATE: 2004-06-18

Sequence 5, Application US/09380728A

Sequence 5, Application US/09380728A

Patent No. US20020081583A1

APPLICANT: Abe, Satoshi

APPLICANT: Rodama, Hirofuni

TITLE OF INVENTION: same, solid phases for detection of the same and preparation methods of CURRENT APPLICATION NUMBER: US/09/380,728A

CURRENT APPLICATION NUMBER: US/09/380,728A

CURRENT FILING DATE: 1999-09-08

NUMBER OF SEQ ID NOS: 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; NAME/KEY: misc_feature
; CTHER INFORMATION: a synthetic probe nucleic acid, 5'-terminus:Phosphorylated,
; OTHER INFORMATION: 3'-terminus:Biotin
